This fair is organized with the audit of TOBB(The Union Of Chambers and Commodity Exchanges of Türkiye) in Accordance With The Law No.5174

## From Vehicle to Charging Infrastructure

### End-to-End Solutions at EV Charge Show

Since its inception, EV Charge Show has placed charging infrastructure at the heart of this transformation. Because without charging, there is no e-mobility. Thanks to this clear focus, EV Charge Show has quickly become one of the industry's

leading meeting points. In 2026, EV Charge Show maintains this focus while adding new links to the value chain to support fleet electrification. Energy storage solutions used in electric vehicles and charging stations are being incorporated into the fair's scope

as complementary components positioned around charging infrastructure that accelerate decision-making processes. Thus, all technologies and solutions from vehicle to charging will be presented as a complete ecosystem under one roof.

## Accelerating Fleet Electrification

### Driving Faster Industry Growth

Despite the significant fuel cost savings that electric vehicles offer, companies are postponing their fleet conversion decisions due to **“how do we do it?”** concerns. The courage to make this transformation decision is only possible by having the right information, addressing operational concerns, and thereby building confidence. To support the acceleration of fleet electrification,

this year's addition of electric vehicles and energy storage solutions used in charging stations to the product groups makes the show a single-roof platform offering end-to-end solutions specifically for corporations, municipalities, and facility managers aiming to electrify their fleets. Target visitor groups will thus have the opportunity to explore the entire value chain—from

vehicles to charging infrastructure, from software to energy management—on a single platform and will be ready to commit to the transformation.

---

**Be part of EV Charge Show, position yourself at the center of this transformation, and strengthen your presence in the industry!**

---

**Not Only the Largest in Its Field,**

**But Also the Most Comprehensive Event**

As the e-mobility sector grows rapidly, being present on the right platform is critical to gaining a competitive edge and shaping the future. EV Charge Show is not just a trade fair—it is a strategic meeting point that will drive our industry into the future. Beyond the exhibition floor, EV Charge Show is enhanced with rich content components including **Conference, Talks, StartUP Zone, Competition**, and more, offering

participating companies a multi-layered engagement platform in terms of brand visibility, expertise sharing, and qualified networking. The event brings together all stakeholders of the industry within a strategic framework, focusing on the technologies and business models shaping the future of sustainable mobility. As the most comprehensive regional and international meeting point for

the electric vehicle charging ecosystem, EV Charge Show will take place at Istanbul Exhibition Center on November 12–14, 2026. In 2026, EV Charge Show will once again—for the fifth time—bring together hardware and software manufacturers for electric vehicle charging, service providers, solution partners, and all stakeholders of the e-mobility ecosystem with public and private sector investors.

## Exhibitor Product Groups

- EV Charging Hardware & Software
- Smart & Fast Charging Solutions
- Megawatt Charging Systems
- Charging Network Operators
- Electric Vehicles (Passenger & Commercial)
- Energy Storage and Battery Management Systems for Charging Stations
- Charging Point/Station Design, Construction and Operation Services
- Connectors, Sensors, Components, Modules, Cabinets, Charging Guns, Cables, Parts
- Payment Systems, Testing, Measurement, Control, Industrial Design, Services

## Target Visitor Groups

- Facility Managers (Factories, Residential Complexes, Hotels, Hospitals, etc.)
- Fleet Managers (Corporate Vehicles, Public Transportation, Cargo Carriers, etc.)
- Municipalities, Public Institutions, Smart City Planners
- Home Charging Unit Buyers
- Energy Generation and Distribution Companies
- OEM Manufacturers, Investors
- Installers, System Integrators, Engineers, Technical Managers
- R&D Officials, Industry Representatives, Academics

**Take Advantage of the Early Registration Discount  
10% Off Until March 31!**

## 2025 Event Highlights:

### Past Success, Future Opportunities

#### Exhibition

The widest range of products and cutting-edge technologies met with buyers looking to establish new business connections.

#### Conference

The present and future of e-mobility were discussed with expert speakers from around the world, mapping out the industry's strategic roadmap.

#### Megawatt Charging Special Exhibition

Professionals seeking to explore the future of commercial vehicle charging were offered a unique experience in this dedicated area. Industry leaders such as Siemens, Volvo, Amphenol, Inovat, and Raquun exhibited their knowledge and products in this zone.

#### Talks

Representatives from exhibiting companies took the stage to share knowledge, experience, and concrete business opportunities.

## Competition

International E-Mobility Innovation and Entrepreneurship Competition: A total of USD 7,500 in prizes was awarded to innovative projects, supporting the stars of tomorrow.

## StartUP Zone

Early-stage ventures presented their products, prototypes, and solutions to investors, laying the foundation for new collaborations.

## Gala Dinner

Industry professionals came together at this prestigious dinner to seize valuable networking opportunities.

## Welcome Reception

An intimate and productive first networking experience was shared over cocktails and music.

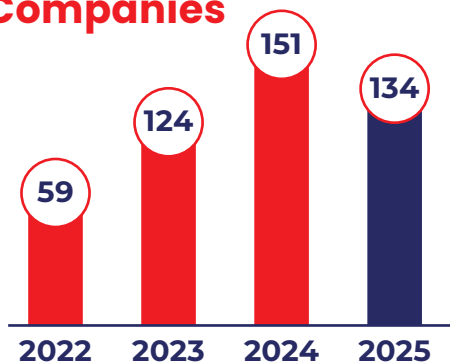

**EV Charge Show focuses on delivering stronger business outcomes for participants every year.**

## EV CHARGE SHOW 2025: Our Success in Numbers

### Total Number of Exhibitors: **134 Companies**

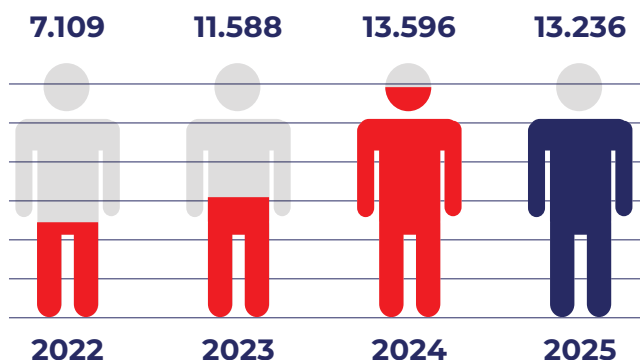

### Exhibitor Distribution by Country

- Turkey
- China
- Germany
- Albania
- Netherlands

## Number of Visitors: 13,236 Professional Visitors

## Visitor Profile Distribution:

"These figures demonstrate that your booths are meeting with a highly qualified and decision-making audience."

## International Visitors: 2,491 Continental Distribution

- Europe: **976**
- Asia: **633**
- Americas: **12**
- Africa: **251**
- Middle East: **437**
- Russia and Turkic Republics: **182**

"EV Charge Show, as a regional leader, opens doors to international collaborations."

## Media Reach:

120 journalists from 5 countries visited EV Charge Show and press events, completing the event's media coverage.

They provided international coverage with over 320 news stories in daily newspapers, online media, radio, and television worldwide.

- **120 Journalists**
- **5 Countries**
- **170 Accredited Media Outlets**
- **320 News Stories**

# EV CHARGE SHOW

Putting You One Step Ahead with Rich Content Components!

## 5th International EV Charge Show Conference: Where Future Strategies Take Shape

This prestigious event brings together e-mobility professionals, government representatives, and academics from around the world. Our conferences serve as a regional knowledge and decision-making platform that addresses critical topics of vital importance to both public and private sectors, featuring organized sessions as well as networking events in an intimate setting. Secure your place at this conference to build the future of electromobility and discover innovations paving the way for a sustainable electric future! **Take advantage of the speaker opportunity offered to our exhibitors to communicate your expertise directly to industry leaders.**

For information on becoming a speaker and program details:  
[www.evchargeshow.com](http://www.evchargeshow.com)

## StartUP Zone: The Heart of Innovation, Solutions of the Future

A dedicated exhibition area for startups, the lifeblood of the industry. In this special zone, innovative business models meet industry professionals and investors, and entrepreneurs gain visibility in the sector. Each independent 6m<sup>2</sup> ready-made booth can be customized according to needs; ideal for demos, product demonstrations, and presentations. StartUP Zone is also offered to startups with a very special discounted participation opportunity. **Secure your place in StartUP Zone to showcase your venture, meet investors, and establish new collaborations!**

### **Talks Corner Technology and Business Opportunities Stage:** Share Your Knowledge, Grow Your Business

Talks Corner is an interactive content-sharing area prepared for those curious about the inner workings of e-mobility technologies, where knowledge and experience are shared and brands present business opportunities. Topics forming the backbone of the industry—such as charging station equipment, software architectures, energy management solutions, fleet operation optimization, and smart grid integrations—are delivered by experts. Only representatives from companies with exhibition stands can be speakers in the Talks area. Free reservations can be made through the exhibitor portal to become a speaker and select an available time slot. **Reach your target audience directly by sharing your technology or the concrete business opportunities your brand offers on this stage!**

### **4th International EV Charge Show E-Mobility Innovation and Entrepreneur- ship Competition:** Discover and Support the Stars of Tomorrow

During this period of accelerated transition to electric vehicles, this competition is organized to identify mature innovative ideas in the e-mobility field, support their commercialization, and provide mentorship to project owners. Competitors are supported with a total prize pool of USD 7,500. **You can support the stars of tomorrow and be part of innovation by attending finalist presentations and the grand awards ceremony, or by becoming one of the competition sponsors.**

**“The decision to transition to electric requires the right information, clear answers to key concerns, and the confidence to move forward. EV Charge Show is structured to support this transition.”**

# Istanbul: The Global Meeting Point of E-Mobility

## Strategic Bridge, Unparalleled Experience

Why do global brands and international investors choose Istanbul for access to the rapidly growing e-mobility market? Istanbul, host to EV Charge Show, is not just a city; it is a strategic bridge connecting East and West, and an unforgettable experience center for the business world.

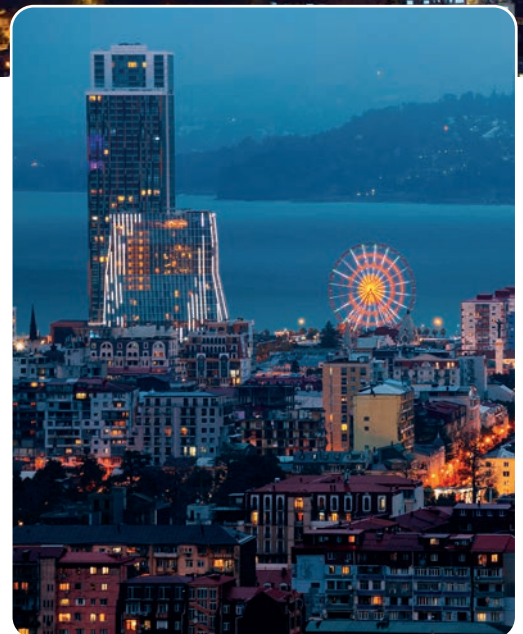

### Unique Geographic Location and Easy Access

**Easy Access Without Visa Barriers:** Compared to European countries in particular, Turkey's visa facilitation (visa-free or visa-on-arrival arrangements) offers a significant advantage for international participants and visitors. This makes your business travel stress-free and accessible.

**Global Transportation Network:** Istanbul is an easily accessible hub with an extensive flight network worldwide. Business people from all parts of the globe can conveniently reach EV Charge Show directly or with a maximum of one connection.

**Strong Facility and Accommodation Infrastructure:** Modern exhibition centers, internationally standard hotels, and extensive accommodation options make your fair experience comfortable and productive.

## Strategic Business and Trade Center

**Regional Leadership:** Turkey's rapid development in e-mobility and charging infrastructure, along with its regional leadership, makes Istanbul a model and attraction center for neighboring countries. EV Charge Show is the main meeting point capturing the pulse of this dynamic market.

**International Trade Network:** With its deep-rooted trade history and dynamic economy, Istanbul offers unique opportunities for establishing international business connections. This is the ideal platform for expanding into new markets and growing your existing network.

**"Capital of the World" Opportunities:** Positioned as the "Capital of the World" in Napoleon's words, Istanbul stands out not only for its historical and cultural riches but also as a unique center strategically and experientially for business connections.

## An Investment-Focused Platform

Charging technologies, the critical link in the electric vehicle transformation, are becoming the focus of more investors each year. EV Charge Show provides a productive business development environment that brings together high-potential solutions and investors on the same platform. You're at the right address to invest in tomorrow's technologies or find investors.

## Global Agenda, Common Language

Conference content is determined according to global needs; technical sessions are conducted in English with simultaneous translation for international participants. This eliminates language barriers and allows professionals from around the world to actively participate in knowledge sharing.

**Shape the future of the e-mobility sector in Istanbul and strengthen your global network.**
